

XHP (XHP-2) type straight line type bottle washing drying machine

Purpose and brief

This machine is applied in win the champion again kill gerents or not need the kill gerents handle to take orally the liquid bottle for cleaning drying, after this machine handle to can directly used for the pack, this machine transports the bottle by screw, pressure water the inside outside flush, the hot breeze circularly blow the dried way to proceeds to bottle to pack the handling of front, and is a stanza that take orally

Main technique parameters

Production capacity: 80 ~ 120 bottles per cent (160 ~ 250 bottles per minute)

Suitable bottle: 10 ~ 20ml straight bottle

Square type: straight, hot air circulation

Drying temperature: 120 ~ 140

Back water consumption: 0.5m³ / h pressure: 0.2 ~ 0.3 MPa

Deionizer water consumption: 0.5m³ / h pressure: 0.2 ~ 0.3MPa

Purification of compressed air consumption: 0.4m³ / min pressure: 0.3 ~ 0.4MPa

Power source: 380V, 50Hz three-phase four wire system

Power rate: < 10Kw (15Kw)
