

M-1080S 10-3000ml Small Milk Beverage Bottle Drinks Filler

This semi-automatic filling machine is equipped with diaphragm pump, which is suitable for filling low viscosity liquid like water, milk, juice, perfume etc. It is with weighing function; the electronic scale detects the weight in real time and send the signal back to the system. The pump will stop to work immediately after reaching the set amount. These kinds of machine can fill liquid more accurately.

Technical Parameters:

- Machine model:M-1080S
- Machine voltage:110/220V 50-60HZ
- Machine power:30W
- Machine pump:Diaphragm pump

- Recommend filling range:5-1000g
- Maximum flow rate: ≤ 3.2 L/min(based on water)
- Filling nozzle diameter:OD8.8mm
- Maximum weight:3kg
- Maximum suction distance:2m
- Suitable bottle height:85-250mm
- Machine size:About 180*180*395mm
- Machine weight:About 2kg
- Package size:About 330*220*235mm
- Package weight:About 2.5kg.
