YX-G100 Pharmaceutical Liquid Filling Machine for ampoules&bottles

YX-G100 Pharmaceutical Liquid Filling Machine for ampoules&bottles characteristics:

The liquid filling machine is designed in the structure of electric cranks as well as piston which is widely applied to the pharmaceutical liquid agent filling like the pharmaceutical preparation eye drop ampoule bottles plus other liquid filling in quantitative filling ; The liquid filler equipment, meanwhile, is suitable for the liquid filling analysis of laboratory, especially for the Insecticide Factory from small to large scale.

- Man-machine interface, direct setting the quantities filling volume.
- PLC program controlling system, Inverter to adjust the speed for linear filling.
- Volumetric flow meter in high accuracy for filling.
- Anti-dripping-leaking with the mechanical sealing plus vacuum back sucking

YX-G100	
Filling range	10-100ml (filling volume adjustable)
filling speed	10--30b/m (filling speed adjustable)
Accuracy	±1%
Voltage	220V/50HZ
Outer dimension	180×300*480mm
Weight	18kg
