

Automatic Weighing Filling Packing Machine CM-DBJ

Suitable for packaging creams, lotions, shampoos and other products.

Standard configuration

- *The main electric control adopts Panasonic technology (PLC).
- *The linear bearing adopts South Korea (PFKF).
- *Stepping motor adopts Nanjing Institute of Technology (Huaxing)
- *The paper feeding motor adopts the Lianyi brand (Hengdian Group).
- *The photoelectric system adopts German technology.
- *The temperature controller adopts Keyang Company (domestic brand).
- *The machine contact material adopts authentic 304#.
- *After-sales service: The machine has a one-year warranty and lifetime maintenance.

Technical Parameters:

- Series Name: Filling/Packing Series;
- Model number: LM-DB;
- Name: Bag charter;
- Mode of operation: automation;
- Production capacity: 30-80 bags/min;
- Measurement range: 1-50 ml;
- Bag size: L20-150(mm) W30-100(mm);
- Sealing lines: reticulated/straight;
- Bag-making type: three-side seal/four-side seal;
- Total power rate: 1100w;
- Power supply voltage: 380V/50Hz/220V/50-60Hz;
- Packaging materials: paper/polyethylene, polyester/aluminum foil/polyethylene, polyester/polyethylene, nylon/polyethylene, tea filter paper, etc.;
- Machine weight: 220 kg;
- Dimensions: L625*W750*H1650(mm).
