

Cereal Balls/Cereal Bars/Granola Bars Making Machine HTL-648

The production line is a fully automatic complete plant for black sesame balls, black sesame cereal bars, oatmeal bars, puffed rice candy bars, melon seed balls, nut balls, etc. Achieve unmanned operation, and the shape can be customized according to needs;

Features:

1. It adopts computer program control, scientific design, smooth operation without impact and bumps, and solves the shortcomings of current domestic similar products such as slow feedback;
2. The mold and hopper are designed and manufactured using food-grade materials;
3. The molding system has electronic eye tracking and alignment, two-level mechanical correction, accurate positioning, and high yield rate;
4. Automatic cloth, automatic blanking, automatic demoulding, low defective rate;

Technical Parameters:

Model	HTL-648
Yield	100kg/h
Voltage	380v
power	4kw
weight	1250kg
Size (length, width, height)	5500x1160x1200mm
