

## *KENO-ZYH660D Combi-Folding Machinery*

The ZYH660D is a folio buckle-knife combination folding machine with a pile feeder or around feeder. Parallel folding of the ZYH660D can be carried out times with the buckle plates. The folding fans of the signatures may be concertina fold, parallel fold or letter fold. The ZYHJ660D can handle parallel folding 2 times. Right-angle folding can be carried out 3 times combination the buckle plates and the folding knives. At the same time of folding, perforating and creasing can be handled. The standard machine is suitable for handling 8mo, 16mo and 32mo signatures. The two-on folder can handle 32mo two-on signatures, except possessing the folding functions of the standard machine.

### **Technical Data:**

Max. sheet size	660×1040mm
Min.sheet size	150×200mm
Sheet weight range	40-200g/m <sup>2</sup>
Max. fold-roller speed	150m/min
Max. fold-knife speed	150 strokes/min
Power	5.2kw
Weight	1400kg
Dinmensions	4150×1620×1710mm
