

## *Bottled Pure Water Filling Machine CGF8-8-4*

The large bottle pure water filling machine is specially used for 3-5l mineral water, purified water and other advanced filling machines. It is suitable for a wide range of bottles, barrels, bottles and pots. It has a wide range of measurement and high quantitative accuracy. Computer automatic control, touch color screen operation, convenient, fast, accurate, to achieve full automation, and with automatic interlock protection device, memory with intermittent movement and continuous movement two working modes. Equipped with electrical linkage, reliable operation, low failure rate and high technology content, it is a suitable choice for automatic liquid quantitative canning.

The bottled pure water filling machine adopts bottle neck positioning conveying mode, which can be applied to various sizes of bottles with only a few changes, which greatly reduces the wear on the bottle body and ensures smooth transportation. The filling method is micro negative pressure gravity filling, which can improve the filling speed and accurately control the filling liquid level.

### **Technical Parameters:**

<b>Model</b>	<b>Output</b>	<b>Power</b>	<b>Dimensions</b>	<b>Weight</b>
<b>CGF8-8-4</b>	1000BPH(5L)	6.5 Kw	2600*1650*2300mm	3500 Kg
<b>CGF9-9-4</b>	1000-1500BPH(5L)	7 Kw	2600*1700*2300mm	3600 Kg
<b>CGF12-12-4</b>	2000-3000BPH(5L)	8 Kw	2800*2000*2300mm	5000 Kg
<b>CGF18-18-5</b>	3800BPH(5L)	9 Kw	3200*2500*2300mm	7000 Kg
