

## *Ultrasonic Tube Filling and Sealing Machine UP-9*

Ultrasonic tube filling and sealing machine uses intelligent digital ultrasonic technology to enable molecules on the surface area of the tubes to be fused together by ultrasonic friction. Intelligent digital ultrasonic welding avoids the disadvantages that weak welding causes due to foreign matter adhering to the walls.

UP-9 fully automatic ultrasonic tube filling and sealing machine is the perfect choice for pharmaceutical and cosmetic cream or other cream products.

### **Technical Parameters:**

Model	UP-9
Sealing Diameter	10-50mm
Max. tube height	200mm
Capacity	20-30 tubes/min
Filling Range	– 25-250ml (standard) – 5-60ml (option) (Custom made available)
Output power	2KW
Voltage	AC220V / 50/60HZ / single phase
Machine weight	300kgs
Dimensions	1300*900*1550 mm
