

High-speed continuous cartoning machine BCWZ300-04

High-speed continuous cartoning machine is suitable for cartoning and packaging of pharmaceutical aluminum-plastic plates, medicine bottles, cosmetics and similar items. The machine operates stably and reliably, and different specifications of cartons can be easily changed and adjusted. It can automatically complete the functions of folding instructions, opening cartons, putting products and instructions into cartons, printing batch numbers, sealing cartons, and automatic carton output. A series of automatic protection devices are configured to ensure the safety and effective operation of the machine. It adopts imported servo motor drive to realize intelligent integration and high-speed operation.

Features:

- Adopt rear pusher structure and optimize ergonomic design to make the operation more convenient.
- Optional high-speed folding machine imported from Germany.
- Extended carton bin can hold about 1500 cartons.
- R&D designed high speed planetary discs swing back and forth synchronously to accurately place materials into the carton conveying chain plate.
- Equipped with 4 high-speed rotating suction heads to draw, open and release cartons into the conveying chain plate.
- Adopt balcony structure, easy to clean; the transmission area is closed at the back of the machine, and the working areas are isolated from each other to avoid cross contamination.

Technical Parameters:

Model	BCWZ300-04
Maximum capacity	1~300 box/min
Carton size range	MAX:200*90*60mm MIN:75*30*15mm
Voltage	3P 220/380V 50/60HZ
Power	3.5KW
Air pressure	0.5~0.8MPa
Machine weight	2000kg
Machine size	L:3500mm W:1700mm H:1900mm
