

LTPK LT-SRP01 Automatic Single Head Servo Rotor Pump Filling Machine

The automatic single head rotor pump filling machine is controlled by a PLC touch screen control panel. Servo motor control, stable and fault free, equipped with automatic feeding function. It has the characteristics of long service life, easy maintenance, stability and reliability, convenient operation, accurate measurement, and fast speed. Heating and mixing function can be customized as production need.

Application:

Suitable for various creams, ointments, essential oils, laundry detergents, shampoos, shower gels, semi fluids, honey, and various viscous materials.

Technical parameters:

Model	LT-SRP01
Voltage	220/110V
Power	850W
Filling speed	20-60 bottles/min
Filling accuracy	±0.5-1%
Filling range	50-1000ml
Air pressure	0.4-0.6Mpa
Hopper size	40L
Control	PLC touch screen
Machine weight	About 150kg
Machine size	About 200*100*160cm
