

DXDP-40II Automatic Tablet Packaging Machine

DXDP-40II automatic tablet packing machine is suitable for automatically packaging round tablets used in medicine, food and spherical sugar coated tablet, plain film, chocolate bean and other granules. This tablet packaging machine can automatically finish package production, measuring, filling, sealing, cutting, counting, heat pressing and adjusting the angle of installing substance. Packing materials include Cellophane Paper/Polyethylene, BOPP/Polyethylene, Aluminum Foil/Polyethylene, etc.

Features

1. Our automatic tablet packing machines adopt singlechip control offered by American Intel computer. The length of package can be adjusted.
2. Tablet packaging machine adopts advanced chain pitch wheel transmission system to conduct continuous sealing. This will guarantee the machine's stable operation, decrease noise and increase its efficiency.
3. Unique oil seepage lubricant system can lubricate for 24 hours, which greatly lengthens the service life of automatic tablet packing machine.
4. Its stainless steel cover meets GMP standard.
5. DXDP-40II tablet packaging machine is equipped with antipollution and dustproof device.
6. Minimum sealing temperature variation employs PID temperature. The tolerance is controlled within $\pm 2\%$.
7. It can automatically adjust the pouch size and filling range.
8. Chuanchu automatic tablet packing machines have gained the European CE certification.

Technical Data

Type	DXDP-40II Automatic Tablet Packaging Machine
Bag Size	L: 55 mm to 110 mm; W: 30 mm to 80 mm
Capacity	30 bags/min to 80 bags/min
Filling Range	1 ml to 50 ml
Power	220 V, 50 Hz, 1.5 kW
Weight	350 kg
Dimension (L × W × H)	600 × 790 × 1780 (mm)
