

Double Line Shumai Machine HSM-600

ANKO's Automatic Shumai machine has the capacity to produce 5,000 to 6,000 pieces of shumai (siomai) per hour. It only requires loading the pre-mixed dough into the hoppers. ANKO can customize the machine according to client's demand to produce the weight of the shumai from 14g to 80g per piece and adjust the height between the wrappers and fillings. Additionally, the garnishing device can place ingredients such as green peas or diced carrots onto the shumai for an enhanced visual appearance.

Features:

- **The Built-in IoT System:** You can now sign up and log on ANKO's IoT website to monitor and manage your food production with integrated food production technology. All the manufacturing data and the production yield rate is collected daily and analyzed via Big Data to provide you with cost-effective suggestions for making your production line more effective.
- **Automatic double line shumai machine:** Putting well-kneaded dough and filling into the hoppers, after switching on machine, it will make dough pastry wrapper by pressing, pulling and cutting, stuffing filling, forming and sending the products to the conveyor automatically.

- Advanced design and sanitation: ANKO follows Food and Beverage Safety and Hygiene Policies and Procedures, all the parts in contact with food are made of food standard stainless steel and plastic.
- Uniform products and high capacity: Thickness of wrapper and weight of stuffing are adjustable.
- Product size can be customized: Based on client's production requirements, ANKO's machine can produce shumai (dim sim) at up to a maximum weight of 80g per piece.
- The machine is easy for operation, cleaning, assembling, and repairing.
- Its special filling system can apply wide range of filling types such as beef, pork, shrimp, fish paste(surimi) and etc.
- There is a special sensor system installed on our machine which enables the filling system only when there is wrapper on the machine, so there will be no filling loss if you run out of wrapper.
- Special micro adjusting mechanism is installed on the wrapper pressing rollers enable you to adjust wrapper thickness.

Technical Parameters:

- Type: Double line
- Dimensions: 1,400 (L) x 1,200 (W) x 1,970 (H) mm
- Power: 3.3 kW
- Capacity: 5,000–6,000 pcs/hr
- Product name: Shumai
- Product dimension: 25–35 (Dia.) x 25–30 (H) mm
- Product weight: 14–30 g/pc
- Dough belt:
- Width: 60–70 mm
- Thickness: 0.3–0.5 mm
- Optional accessories: CE kit
- Weight (net): 760 kg
