

DC-833 Fully Automatic Powder Press

The DC-833 fully automatic powder press is specifically designed and developed for powder compact products in the cosmetics industry. It can achieve truly automated production, requiring no manual assistance throughout the entire process.

The mechanical ventilation pre-pressing device effectively prevents excess air from remaining in the finished product. Equipped with a product stacking and visual automatic identification system, it is suitable for production configurations of various shapes of aluminum pans and can automatically stack finished products after production, facilitating later boxing. The mechanical internal powder pressing mold is easy and convenient to replace. It is your optimal choice for producing powder compact products.

Technical Parameters

Model	DC-833
Mold Size	Maximum: 200mm X 200mm
Production Efficiency	120 times/hour
Cloth Roll Specifications	Inner diameter 36mm; width 240mm; diameter within 200mm
Film Roll Specifications	Inner diameter 28mm; width 230mm; diameter within 100mm
Voltage	220/380V, 50-60Hz, 12Kva
Air Consumption	6.0kg/cm ³ , 800L/min
Equipment Dimensions	L2000mmXW1500mmXH2110mm
Equipment Weight	1800kg
