

GS-D Desiccant Inserting Machine

Exclusively used in strip desiccants or deoxidization bags dispensing and filling process.

- Strong compatibility, suitable for all kinds of specifications, all kinds of material round, flat, square, flat square bottle.
- Desiccant bag with color label and colorless label disc shape bag.
- Desiccant bag thickness adaptive design is adopted to avoid the occurrence of broken bag in the process of transmission.
- High durable knife edge, accurate and reliable cutting, will not cut the desiccant bag.
- With a number of monitoring and alarm control functions, such as no bottle work, fault self-check, desiccant bag not into the bottle, to ensure the continuity of equipment operation and the accuracy of desiccant bag stuffing.
- Fully automatic operation, intelligent joint control with upper and lower processes, good coordination, no special operation, saving labor.
- Chinese or English control panel, can save 10 groups of variety parameters, adjustment, use especially convenient.
- The control chip is originally imported from the United States, and the photoelectric sensing component is produced in Taiwan, which is stable and durable.

Technical Parameters

Model	GS-D
Capacity	50-120BPM
Voltage and power	220V/50HZ 0.5 kw
Main material of equipment	SS304
Control system	MCU
The compressed air	0.6 Mpa
Size	1600×750×1780mm
Weight	250kg
