

## HDL-100 Automatic Roll Machine

Can automatic continuous production compare with manual taste cone products.

### Features

1. The machine is composed of 4 parts, namely, automatic grouting part, electric heat baking part, mechanical rolling part and finished product conveying part, which is fully automatic from grouting material to finished product conveying.
2. With less noise and pollution free, The device uses electric heating plate to heat while selection of material meets food hygiene standard.
3. The device can produce automatically and continuously with stable and high yield to ensure uniformity shape, color consistency, pure and delicious taste of watch egg rolls.
4. Independent PID to control temperature.
5. The device is fully automatic to ensure all buttons function can be controlled on the panel, which is east to operate.

### Specifications

Type	HDL-100
Heating power	4*2.5KW/380V
Transmission Power	1.1KW
Compressed air	0.2m/min >0.5Mpa
Mould quantity	2 pcs
Production	350-500 pcs/hour
Egg roll size	Diameter: 18-25mm, Length:130 180mm
Power	380v 50/60Hz
Machine size	(L)1930*(W)600*(H)1650mm
Machine weight	About 580KG
Hopper capacity	18L
