

MIC-SF1 PFS Filling Machine

The MIC-SF1 PFS Filling Machine developed by Mic Machinery is a high-precision solution designed for the aseptic filling of pre-sterilized syringes. Built to meet the strict requirements of pharmaceutical and biotechnology industries, this equipment integrates advanced automation, stable performance, and user-friendly operation. It is widely applied in the production of vaccines, biologics, injectable drugs, and other high-value liquid formulations, ensuring safety, accuracy, and efficiency throughout the filling process.

Parameters

Filling Volume	0-50ml
Output	0-30 Syringes/Min
Power Supply	240V 60HZ
Air supply	0.6 Mpa
Power	1.5 kw
Dimension	1280*1000*1390mm
