

AWC-60 Automatic Weight Checker

AWC-60 Automatic Weight Checker have adopted advanced weight sensor and detecting device for this machine which is controlled and operated by Siemens PLC and Schneider component with low voltage. All electrical appliances have been placed in explosive-proof cabinet. We use touch screen and there is instruction for all fault, which make the operation easy. The excellent conveying design makes products run stable. The defective cans can be kicked out in both sides which can guarantee quality of products. This machine with high accuracy and good stability can run fast and so on.

Technical Parameters

Model	AWC-60
Production capacity	60 times/min
Power supply	AC380V
power	0.8KW
Maximum detection weight	1.5KG
Machine division value	0.1G
Static deviation	0G
Dynamic detection maximum deviation	±1.0g
Air source	0.6Mpa-0.8Mpa clean and stable air source
Maximum air consumption	0.6m ³ /min
Can Height	60~350
Can Diameter	Φ35~Φ70
Weight	about 500kg
Dimension(L×W×H)	1500×1100×1800
