

JG-2R Small Metering Filling Machine

Device characteristics

- This machine is a small metering filling machine,
- Mainly filled with peristaltic pumps.
- Automatic bottle entry, automatic bottle exit
- It has the function of no bottle, no filling
- All electrical components are made of well-known brands.
- This machine is intuitive and convenient to operate, with no bottle filling and precise measurement.
- Advanced design, compact structure, fully compliant with the new GMP standards.

Technical Specifications:

- Applicable specifications: 5-25ml
- Production capacity of: 20-60 bottles per minute
- Filling accuracy: $\leq \pm 1\%$
- Power supply: 380V/50Hz
- Power: 1 kW
- Machine net weight: 450 kg
- Dimensions: 2000 * 1000 * 1500 mm
