

AP-360F-400 Semi Automatic Flatbed Screen Printing Machine with Rotary Table

AP-360F-400 is a semi-automatic flat screen printing machine with a rotary table. Brand PLC controlled with pneumatic driven, max print size 100x150mm, 4 working stations. This flat-screen printer is excellent for small parts. It allows for easy loading and unloading while printing.

The rotary table machine can have rotary tables in different sizes, depending on requirements, such as 6 or 8 stations. And the work table can be with or without a vacuum.

Features:

- A famous brand PLC controlled with a touch screen
- Printing speed and stroke are adjustable.
- Vertical head lift with height adjustment.
- 4 stations printing can meet fast print capacity.
- Squeegee angle and calibrated height adjustment
- 100 x 150 mm work table, suitable for small items and fast printing.
- Regulated squeegee pressure with a pressure gauge
- Foot switch controlled

Technical Specifications

Model:	AP-360F-400
Printing Capacity:	Up to 1,600 pcs per hour
Printing Head:	Pneumatic
Drive (up/down, front/back):	Pneumatic
Control System	PLC with touch screen
Printing size flat (L x W):	100 x 150mm
Work Table size:	100x150mm
Max. print height	120mm
Print stroke (Left & Right):	350mm
Screen Lift Stroke (Up & Down):	125mm
Voltage:	110V / 220V 50/60Hz 50W
Weight:	180kg
Dimensions:	580 x 780 x 1350mm
Crate Size:	600x800x1600mm
