

SED-JB1000 Mini Type Tablets Sugar Coating Machine As Pharmaceutical Machinery Equipment

Our this small chocolate coating machine is mainly used for coating the nuts, peanuts etc. It is the last processing step to make ball type products.

This small chocolate coating machine consists of main body, worm wheel box, coating pan, heating device, hot air & common blower, electrical equipment, etc.

The transmission process that the motor drives the worm wheel and worm via triangle belt to make the coating pan rotate. Then the material revolves up and down in the coating pan, so that even mixing, pelletizing and polishing can be completed well.

Feature of Coating Machine

1. This machine is a special equipment which is used to coat the flour or sugar and to form the shape.
2. The coated peanuts are round and smooth.
3. It also can process almond, cashews, soybeans and so on.
4. This equipment has been up to the export processing standard.

Product Parameters

Model	SED-JB600	SED-JB800	SED-JB1000
Dia. of Pan (mm)	600	800	1000
Rotary Speed of Pan (r/min)	46	36	32
Power of Fan(kw)	0.075	0.12	0.12
Power of Heat kw	1	2	2
Production Capacity(kg/time)	15	36-50	45-70
Motor(kw)	0.75	1.1	1.1
Overall Size (mm)	930*800*1000	1000*800*1480	1070*1000*1580
Net Weight(kg)	120	205	230
