

SED-1BS Semi-Automatic Desktop Capsule & Tablet Counter

This precision counting machine is designed to accurately count and fill various shaped products including soft gel capsules, hard capsules, tablets, sugar-coated and film-coated tablets, pills, herbal medicine, and similar products into containers or vials. The adjustable counting range of 1-9999 pieces per bottle requires no spare parts changes.

Features

- Automatic counting with manual bottle feeding and automatic capsule filling
- CCD sensitive technology with programmable controller for high resolution, fast response, and accurate counting
- Touch screen operation for easy bottle and filling volume changes
- Simple structure with convenient maintenance, low noise, and low power consumption
- Multi-function operation with automatic stop when no bottle or medicine is detected
- Fully compliant with GMP standard requirements

Product Parameters

Model	SED-1BS
Filling Precision	Accuracy $\geq 99.5\%$
Filling Materials	Tablets, pills, capsules, other shaped particles
Applicable Bottle Type	$\leq 500\text{ml}$ round, square and shaped bottles
Machine Output	500 grains/min
Rated Voltage	220V
Rated Power	30W
Host Weight	20kg
Outline Size	440×370×580mm
