

Laboratory Pulverizer

The structure of laboratory pulverized is simple, while the operation is steady. Our laboratory pulverized is made of stainless steel. The inside surface is smooth by tooling, thus the products made from our machine meet the GMP requirements.

Laboratory pulverized utilizes the high-speed relative motion between the moving tooth set and regular tooth set, which makes the material crushed through concussion and friction.

The crushed materials are discharged directly from the mainframe. The size of the granularity is adjusted by changing different number of aperture sifts. The lab pulverized is widely used in chemical, pharmaceutical and food industries.

Technique Parameter of Laboratory Pulverized

Model	130B	180B	250B	320B
Mixing speed (r/min)	7000	7000	5000	4000
Capacity (kg/h)	2-5	10-30	50-250	80-300
Motor power(KW)	1.1	2.2	5.5	7.5
Fineness (mesh)	10-120			
Noise(DBA)	≤85			
Overall size(mm)	400*350*830	690*420*880	950*520*1250	960*520*1450
Weight (kg)	75	85	220	250
