

HALO PARMATECH

ETC-60A Semi-auto Stamping Deblistering Machine

ETC Deblistering Machine is a professional equipment to squeeze things out quickly from aluminum plastic boards. Its advantages include high speed, deblistering completely and pill-shape preserving. It is a presently common-used pill-taking machine on the market. ETC is applicable for different blisters, also equipped with an easily operative regulator. These features make ETC Deblistering Machine the most ideal pill-taking equipment as a good helper to production departments.

Advantages

With good appearance, clear lines and humanization design, easy to clean and use. With good material of 304 stainless steel. Rollers are made of PU and TPR, durable and wear-resisting without cramps. It can protect medicines from secondary contamination. Nicely fitted with a good result and long lifetime for use. Capsules and tablets are completely taken from blisters without any damage to pills. Reasonable and detailed design. The whole design process is in the angle of using. Operated safely, easy to move and adjust for differently sized and arranged blisters to maximize the availability in production. This product is well recognized by western clients, also received high praise from domestic users with its good effects, small size and flexible properties. Its price is good as per its high effectiveness and quality.
