

VFSL5000F Auto Powder Pack Machine

This machine consists of CJSL2000 auger feeder and one VFS5000F vertical packaging machine, especially suitable for metering and packaging of ultrafine powdery products. It integrates metering, bag-making, packaging, sealing, printing and counting into one. It is equipped with advanced level switch and static eliminator and dust collector, which effectively solve the difficulty for fully automatic packaging of powdery dust.

Features:

Metering rang: 100~1000g; 200~2000g
Speed: 20~50bags/min
Bag size :(50~340)×(80~260) mm (L×W)
Metering accuracy: ±0.2~2%
Compressed air requirement: 0.6 MPa 0.36 M³/min
Reek outer dia: Φ400 mm
Core inner dia: Φ75 mm
Machine weight: 1000 kg
Power source: 5.5 kW 380 V±10% 50 Hz
