

XG-2 Automatic High-speed Cap Screwing Machine

- Easy to adjust different caps
A cap-feeding, cap wearing device is suitable for all kinds of caps.
- Torque control, to ensure the quality of capping.
- Swing type cap wheel, the intensity of capping is more appropriate, greatly reducing the cap wheel wear.
- Self-diagnose errors and stop working to make alarm at errors and missing bottles, caps. The bottle with twisted cap, anti-cap and without aluminum foil will be removed.
- Protect caps from harm
Automatically adjust cap-feeding and cap-ordering state, reducing the friction of the collision between the caps and not damage the cap.

Technical Parameter:

Applicable	Common caps, protective ring caps, double caps, Spring caps flip caps etc.
Capacity	50-150 bottles/minute
Power supply	220V/50Hz 1.2kw
Air supply	0.6Mpa, 15l/min
Size	2200*1700*2100mm
Weight	660kg
