

## *MIC-L30-I Aluminum Tube Filling Sealing Machine*

This machine is mainly used for aluminum tube filling and sealing.

It has been widely used in the fields of Pharmacy, cosmetic, food and chemical etc.

### **This machine function is:**

1. Manual tube loading
2. Cam cylinder system-Diving filling with tube base up (Fully filling from tube bottom to head)
3. Air-blow cutting after each filling (Design for high viscosity material like paint, silicone etc.)
4. Nitrogen dosing filling device (Insulate material from air)
5. Automatic benchmarking (Cursor positioning)
6. Automatic tube filling sealing & No tube no filling
7. Automatic tube folding sealing
8. Material hopper can heating and stirring
9. Automatic printing the batch dates code
10. Can update with European accessories like Siemens, Omron and Schneider etc.

-Machine design using your actual sample tubes and material, we support tube testing before payment

-The machine has CE certification, comply with GMP hygiene standard.

-We provide full-lifetime warranty with one year free accessories

**PARAMETER**

|                            |                 |
|----------------------------|-----------------|
| <b>Voltage</b>             | 110V/220V/380V  |
| <b>Power</b>               | 1.1kw           |
| <b>Air Pressure</b>        | 0.6-0.8Mpa      |
| <b>Production Capacity</b> | 25-45 tubes/min |
| <b>Filling Volume</b>      | 1-300ml         |
| <b>Filling Error</b>       | ±0.5g           |
| <b>Material</b>            | SS304/316       |
| <b>Dimensions</b>          | 1500*700*1800mm |
| <b>Weight</b>              | 300KG           |
