

Full-Automatic Screw Capping Machine

1. This machine combines self-rotation, setting cap, putting cap and screw cap to one with fast speed, high efficiency to steadily and reliably operate.
2. Use advanced sensing element to ensure stop sending cap in case of no bottle, automatic stopping machine and alarming when cap getting stuck and lack of cap so as to ensure the reliability of automatic putting cap.
3. Changing bottles and caps of different specification is just easy regulation and convenient operation.
4. Use the world famous brand electric appliances and pneumatic elements with low failure rate, steady and reliable performance and long service life.
5. This machine can be suitable for food, pharmacy, daily use chemical, pesticide cosmetic and other industries.

Production capacity	50-80 bottles/min
Power	0.27 KW 220V 50HZ
Overall dimension	L1500*W650*H1400mm
Weight	210KG
