

Label printing machine

Product Description

Main is suitable to the medicine, Daily chemicals, Personal Care Product, food industry, cosmetic etc cylindrical container or small the conical taper container of flat labeling, double standard automatic positioning labeling. This machine expanding strong! Can be equipped with all kinds of printer to print, online real-time can use single, also can use connect Product line.

Features & Specification

The step or the servo motor system.

2, Clutch design, make the label tension force more stable, and easy to

improve labeling precision.

3, Advanced color man-machine interface control system.

4, Delta PLC control, high reliability.

5, use Germany, Japan magic eye.

6, Machine structure is simple, compact, easy to operation and maintenance.

7, Can add ribbon typewriter, or heat transfer machine and automatic send bottle opener (optional).

Technical parameters :

Container sizes	Width:30-90mm (across the direction of movement) Height:≤300mm
Capacity	150 bpm (depends on bottles & label sizes)
Precision	±1.0 mm (other than errors from bottles or labels)
Power consumption	220VAC±5% 50Hz 2.1Kw
Machine dimensions	(L)3000mm*(W)1420mm*(H)1950mm
