

DPH-250/130 High Speed Blister Packing Machine

It adopts with flat-plate forming mould, normal pressure to form, blister with homogenous hardness, Roll mash sealing, and is equipped with dot printed, indentation device, cross punching without wasting material, with high automation, high efficiency. It is widely used in pack Alu-PVC package for capsule, tablet in pharmaceutical industry.

Main Technical Parameter:

| Model | 130 | 250 |
|----------------------------|------------------|------------------|
| Punch Frequency | 60-110 Times/min | 80-160 Times/min |
| Capacity | 14400 Blister/h | 21600 Blister/h |
| Max forming area and depth | 10mm | 13mm |
| Total Power | 7kw | 9kw |
| Package materials | PVC 130×0.25mm | PVC 250×0.25mm |
| | PTP 130×0.02mm | PTP 250×0.02mm |
| Maximum forming areas | 120090mm | 240×250mm |
| Stroke | 20-100mm | 20-120mm |
| Motor Homer | 1.1kw | 1.5kw |
| Overall Dimension (L×W×H) | 2600×800×1780mm | 3150×900×1500mm |
| Weight | 1500kg | 2200kg |
