

## ***BZ25 Film Packing Machine***

BZ25 film packing machine can automatically complete the function of transport, arrangement, stacking, and then use the material called BOPP for strapping. The very two sides is heat welding to make it a stable strapping. This machine is widely used in pharmaceutical, food, daily chemical and other industries.

- Working environment: temperature 0~45°C Relative humidity less than 85%
- Power: 3-phase 5 wires, AC380V, 50Hz
- Consumption: 7KW
- Air: 0.5~0.9MPa 5L/cycle
- Max capacity: 25 packs/min (According to the layer of stack)
- Packing material specification: BOPP
- Thickness: 0.020~0.035 inner diameter: 76
- Max surface diameter: 300
- Max width: 400
- Dimension: 2420x2020x1210mm (LxWxH)
- Weight: about 1000 kg.
