

JL-250II Softgel Machine

The normal softgel encapsulation system for large-scale production

JL-250III Softgel Encapsulation Machine is newly designed high speed servo motor machine; It is applied into many kinds of fields, like pharmaceutical industry, veterinary medicine industry, health care products, cosmetics industry, paintball industry, tobacco industry and confectionery industry. This machine was assembled by the international advanced technology, with the advantages of high accuracy, high precision, good stability, neat and beautiful appearance and so on.

Technical Specification

Output	58800/h(20#OB; 4rpm)
Die Roll Size	Φ150×250mm
Die Roll Speed	0-5rpm
Plunger	20 sets, 24sets and 34 sets available
Feeding Range	0-2mL
Feeding Variance	±1.5%
Overall Size	2040*960*1900
Overall Weight	1500Kg
Total Power	12kw
Electrical Power	380V/220V/480V/110V/240V/208V/400V/415V 50HZ/60HZ 3Phase
