

CH-series Powder Mixer Powder Blender

CH-series Powder Mixer Powder Blender are mainly used in pharma industry for mixing dry or wet powdered materials.

Description

CH-series Powder Mixer Powder Blenders are mainly used in the pharma industry for mixing dry or wet powdered materials. This machine is also used in chemical and food industries. It does not dissolve materials, volatile or deteriorate when mixing. It is especially suitable for small batch of testing, not entirely suitable for mixing semi solid or sticky materials of mass batch.

Parameter

Model	Volume	Rotational Speed	Pouring Motor Power (KW)	Tilting Angle	Power (KW)	Weight (KGS)	Dimensions(mm)	
CH-10	10L	24 r/min	By hand	115°	0.25	40	600x280x500	
CH-20	20L				0.55	71	750x380x610	
CH-50	50L		0.75		1.1	280	980x420x800	
CH-100	100L				2.2	350	1100x440x900	
CH-150	150L				3	410	1280x600x1100	
CH-200	200L				4	450	1400x600x1200	
CH-300	300L				1.1	5.5	520	1850x700x1200
CH-400	400L					5.5	580	2100x750x1250
