

## JZX-15P Automatic Carton Packing Machine

The high-precision grasping and placing action greatly improves the packing efficiency of bottles. The intelligent touch screen control is simple and convenient, and can also be set to switch a variety of specifications.

### Features:

1. Automatic positioning of high-precision rod dispensing device, accurate bottle spacing control, easy to pour the bottle.
2. Using touch screen operation, to achieve man-machine dialogue, convenient and intuitive, simple and clear.
3. Advanced and simple automatic feeding device, effectively avoid the inertia of the conveyor belt, keep the bottle and carton speed and stable operation.
4. The machine automatically detects the running status. If the machine does not have the packing signal for a long time, it will automatically enter the semi-sleep state, reduce the running speed, reduce the mechanical loss and reduce the energy consumption, and prolong the service life of the machine.
5. The main electrical control components (touch screen, PLC, inverter, motor, photoelectric switch, etc.) use internationally renowned brands, industrial control industry's top products, so that the machine can be fundamentally guaranteed in quality.

### Configuration and parameters:

Size of machine body	L1450×W1020×H2300mm
Machine weight	800KG
Applicable bottle type	Customized
Power supply	220V,4KW
Air source pressure	0.6-0.8Mpa
