

PHS-600F Automatic High Speed Shrink Packaging Machine

It works from feeding, bag forming to sealing and shrink wrapping, widely used in food, medical, cosmetic and stationery industry.

To improve packaging capacity, we design a new side sealing way. The U type sealing line on the side of production ensures the perfect packaging appearance triple.

The packaging capacity is 3 times than general type and it can be connected to the whole production line and it's the best choice for packaging company

Features:

1. Compare to traditional L bar shrink wrapping machine, our shrink wrapping machine has high capacity up to 5-120 packs/min.
2. PLC controller and touch screen set all the parameter easily.
3. Film pulling by servo motor driver.
4. Special customized heat shrink tunnel is high effective.
5. If fault, machine stop automatically and the fault can be display on the screen.

Technical Data:

Model	PHS-600F
Packing film material	POF film, PVC film, PE film etc.
Packing size	W+H+(60-80mm)≤400mm; L:220-580mm
Packing capacity	5-120 pcs/min
Power supply	AC220V 50/60Hz 3.0kW(wrapping device)
	AC380V 50/60Hz 8.0-15.0kW(shrink tunnel)
Wight	650+260Kg
Dimension	6000x1000x1450mm
