

BHX-6D Capping Sealing Machine

This machine is conveying the bottle to the screw conveyor, and then goes to the star plate to the capping machine, the bottle-chuckle chuck the bottle neck (or the belt strap-ping the bottle) to capping process. Finally through the star plate, the capped bottle conveyed to the next belt. The whole capping process finished.

Parameters

Model	BHX-6D
Applicable Dimension	Φ40mm~Φ90mm
Applicable Height	80mm~250mm
Cap Specification	Φ15mm~Φ50mm
Speed	≤8000 bottle/hour
Air Pressure	0.6~0.8Mpa
Air Consumption	200L/min
Power Source	AC 380V/50Hz
Power	3Kw
Weight	about1600Kg
Machine dimension (L×W×H)	2300mm×1360mm×2400mm
