

Manual Filling Machine With Air Push for Lipgloss

The hand pressure filling machine is a manual piston liquid filling machine, with air push, can for some paste with stick, It can be filled with liquid medicine, liquid food, lubricating oil, shampoo, shampoo and other cream/liquid substances, and has the function of a cream liquid filling machine. Its structure is simple and reasonable, and manual operation is convenient. No energy is required. It is suitable for medicine, daily chemical, food, pesticide and special industries. It is an ideal liquid/paste filling equipment. The material contact parts are made of 316L stainless steel, which meets GMP requirements. The filling volume and filling speed can be controlled manually.

Description:

Pneumatic B02 type manual filling machine is based on the manual filling machine B03 to improve, driven by compressed air, with the foot switch and automatic switch, the complete liberation of the user's hands, make the operation more convenient. The product is designed for hospitals, laboratories, beauty salons, small and medium enterprises, such as design, ideal for filling small doses of liquid and paste.

Technical Parameters:

Material of machine	Stainless steel 304
Filling Range	5-50 ml
Capacity of Hopper	10 kg
Filling Accuracy	± 0.2-1ml
Filling Speed	20-60times/min (It varies from person to person)
Working Pressure	0.4-0.6Mpa
Net Weight	18 kg
Gross Weight	22 kg
Machine Size	340x340x780 mm
Packing Size	370×370×800 mm
