

Bottle Labelling Machine XY-G-50A

This sticker labeling machine is used for labeling special products for bags/square bottles. It is suitable for various specifications of bottles and caps with self-adhesive labels. It has the characteristics of simple operation, high precision and accurate labeling.

Features:

1. This flat bottle labeling machine is specially used for labeling special-shaped products. It is suitable for bottle caps of various specifications and has a wide range of applications.
2. Moulds specially made for customers are more convenient to use.
3. The label peeling distance is automatically calculated by length, photoelectric and microcomputer. Easy to use, no need to adjust the photoelectric position.
4. Foot-operated emergency stop switch to ensure production safety and stable operation.
5. Easy to operate, anyone can operate and use the equipment easily and quickly.

Technical Data:

Model	XY-G-50A
Labeling speed:	10-50 times /min(Relates to material and label size)
Label accuracy:	±0.5mm(Regardless of material and label size)
Label Size:	(L)20-130mm (H)20-120mm
Material frame siz:	(L)30-300 (W)30-150 (H)30-350mm
Applicable inside size of label roll:	φ76mm
Applicable outside diameter of label roll:	maximumΦ250mm
Electrification:	AC220V 50Hz/60Hz 120W
Working air pressure:	0.4-0.6Mpa
