

## FXZ-6J Automatic Bottle Capping Machine

FXZ-6J Automatic linear capping machine includes the bottle tightening conveying structure and capping wheels. Under the horizontal movement of the conveyor, it will finish the complete process of capping. It can be widely used for capping of round and flat bottles. The machine is with simple structure, easy adjustment and quick change-over between different bottles.

### Features:

1. Widely used for the capping of different bottles in different industries
2. France Schneider low consumption inverters
3. Synchronous belts and capping wheels which reduces the consumption of materials

### Technical Parameters:

Capacity	6500BPH
Applicable Bottle	Φ35-95mm,Height: 80-230mm
Applicable Cap	Φ20-50mm,Height: 15-40mm
Air Pressure	0.5-0.7MPA
Power Supply	1P/220V/50Hz
Power	2.4KW
Gross Weight	850KG
External Dimension	2000×900×1960mm(L×W×H)
