

## *Horizontal Vial Sticker Labelling Machine For Food Processing*

Horizontal Labeling Machine, also call small bottle labeling machine, it is special labeling for small bottle or small tube labeling. Suck like Oral liquid bottle...

### **Equipment overview:**

Fully automatic self-adhesive horizontal round bottle labeling machine for circumferential or semi-circular labeling of various cylindrical objects with unstable standing. Widely used in cosmetics, food, medicine, daily chemicals, electronics, toys, hardware, plastics and other industries, such as oral liquid bottles, ampoules, vials, electronic cigarettes, plastic bottles, plastic bottles. Horizontal transfer and horizontal labeling are used to increase stability and improve labeling efficiency.

Applicable industries: food processing, daily chemical industry, chemical industry, pharmaceutical industry.

### **Technical Parameters:**

- Label specifications: length 20~90mm; width 20~90mm
- Product specifications: diameter  $\phi$ 15~30mm
- Product height: 30~90mm
- Marked outer diameter:  $\Phi$ 280mm;
- Marking inner diameter:  $\Phi$ 76mm
- Labeling speed: 10~100 bottles/min
- Labeling accuracy:  $\pm$ 1mm
- Air pressure: 0.6~0.8Mpa
- Power: 850w (step), 1150w (servo)
- Voltage: 220V 50Hz
