

6 Head Liquid Filling Machine

The high-precision 6 head liquid filling machine is a high-tech product developed by our company. It is suitable for water injection, fluid and detergent products with different viscosities. It is widely used in the filling products of food, cosmetics, medicine, oil, daily chemical, detergent, pesticide, chemical industry and other industries. Different types of solutions can be filled without adding any additional parts.

Description

Rito machinery company's 6 head liquid filling machine is widely used all over the world, and many chemical and cosmetic enterprises are recommended, followed by GMPs standard.

Feature:

1. This series of machine tools are compact and reasonable in structure, beautiful in appearance.
2. Using electrical components of world-famous brands. The main power cylinder adopts FESTO 6 heads cylinder and magnetic switch, and adopts Japanese Mitsubishi PLC computer, Omron Optoelectronics, and German Siemens touch screen to ensure its excellent quality and stable performance.
3. This machine is easy to maintain. It can be easily disassembled, assembled and cleaned without using any tools. Adjustment is very convenient. It is very convenient to realize accurate measurement, no filling without bottle or lack of bottle.
4. The filling system of this machine adopts card sleeve type quick-fitting sanitary joint. The entire cylinder can be easily disassembled, assembled and cleaned without using any tools. The structure design is simple, and the operation and maintenance are convenient.

Technical parameter:

Parameters	
Filling heads	6
Accuracy	±1mm
Conveyor speed	20-35mm/min
Air pressure	6~7Kg / cm
Air consumption	0.4-0.6mpa
Power	2.8Kw
Voltage	220V50Hz(380V50Hz220V60Hz)
Weight	480kg
