

BSC4525 Semi-Automatic Shrink Packing Machine

Feature:

1. Heat shrinking machine adopt the technology of hot air circulating, so as to adjust temperatures by the use of automatic temperature regulator and to save energy.
2. Widely used in the packing of following products: food, drink, medicine, hardware, wood product, cosmetics, printing, plastics and electronic component etc.
3. All the shrink packing products are not only elegant in look, but also cost-saving in production.
4. In the meantime, shrink packing is conducive to the preserve of the sealed products.

Specification:

Type	BSC4525
Contraction Time	1-6s
Machine Weight	170kg
Shrink Temperature	0-299°C
Conveyor Speed	0-10m/min
Working Table Height	760±30mm
Working Efficiency	2000-3000 bag/hour
Material	PVC, POF, PP, PE
Power	380V/50Hz/9.1KW
Max. Shrinking Size	L980*W450*H250mm
Machine Size	L1330*W750*H1400mm
