

Automatic Plastic Ampoule Forming Filling and Sealing Machine

This equipment is widely applied in the industry of agricultural, pharmaceutical, food, and chemical for the filling of pesticides, oral solution, perfume, cosmetics, liquid, and fruit pulp etc.

Features of the machine:

- PLC control for all the procedures of PE/PVC roll spreading, ampoule forming, filling, sealing, printing serial numbers, cutting the ends, and cutting apart the ampoule.
- Easy operation with HMI.
- No drop, leak, and bubble, and spillage for the filling heads.
- GMP standard, the machine is made of stainless steel.
- Pneumatic components and wirings are imported with world famous brands.
- Automatic and mechanical filling, precise calculation.

Technical Parameters:

Max. Forming depth(mm)	12
Cutting frequency(times)	0-25
Packing materials(mm)	PVC, PE(0.2-0.4)*120mm
Filling range(ml)	2-25ml
Power(kw)	3.5
Voltage	220-380V, 50hz
Overall dimensions(mm)	1800*800*1400
G. W.(kg)	350
