

Econocorp – Model Econocaser Case Packer

The Econocorp Model Econocaser is a horizontal case packer of rugged construction that handles corrugated or folding board materials in a variety of case styles at speeds of up to 10 cases per minute.

Model Description

- Master shipping cases are automatically pulled from the supply magazine and erection onto a single load station.
- Product enters the Econocaser via the infeed belt conveyor.
- Product is automatically collated and loaded in to the erected shipping case.
- Following loading, the machine cycle is initiated and the loaded case is transported to the closure section for either glue or tape closure.
- The loaded, sealed case is discharged from the back of the machine at a convenient working height.

Options:

- Extended or reduced sized cartons outside the standard range;
- Adjustable magazine;
- Extended conveyor length;
- Intermittent Motion drive for conveyor;
- Stair-Step collator/upstacker/downstacker;
- Slipsheet for downstacker;
- 3 light beacon;
- 5' extended carton magazine;
- 5 foot (1.5M) infeed belt conveyor;
- Product Loader;
- CE Guarding.

Features:

- Up to 10 cases per minute;
- Another feature here;
- Sanitary Construction (essentially stainless steel);
- Heavy duty, welded stainless frame;
- Broad size range;
- Single load station;
- Pressure sensitive tape or hot melt closure;
- Simple and fast size changeover;
- Flexibility to run RSC and die cut designs;
- Accommodates both corrugated and paperboard materials.
