

High Powder Mixing Machine VI-300

The VI series forced Mixer Machine is equipped with a stirring shaft, which can mix finer powder particles, agglomerated powders or more than two kinds of powders, and materials containing a certain amount of moisture. The Mixing Machine is made of stainless steel 304, and the inner and outer walls of the mixing barrel are polished. This Industrial Blender machine has beautiful appearance and strong practicability, and is widely used in food, pharmaceutical, chemical and other industries.

Technical Parameters:

- Model No.: VI-300
- Application: Medicine Processing, Chemicals Processing, Food Processing, Powder
- Max. Loading Volume (L): 180
- Capacity(KG/H): 80
- Weight (KG): 480
- Dimension(L*W*H)(MM): 1845*960*1850
