

AC 420A High Speed Automatic Blister Forming Machine

Function:

- Machine automatic forming blister, cutting, automatic product output and residual material recovery.
- Machine is equipped with an accurate temperature control module, PVC fragments and insufficient air pressure auto stop and automatic fault source for damaged electrical parts.
- Machine use human-machine interface and PLC control system, and is equipped with counting, starting password, fault reminder, maintenance reminder and other functions.

Main parameter

Main Parameter

Production speed	10-20 mould/min
Stroke range	30mm-200mm
Max forming area	320mm*160mm
Max standard forming depth	35mm
Forming heating power	3.5kw(*2)
Total power	9kw
Air consumption	consumption \geq 0.5min
Air Pressure	0.5-0.8mpa
Packing material (PVC) (PET)	thickness0.15mm-0.5mm内
Total Weight	900kg
Machine dimension(L*W*H)	2000mm*1900mm*900mm
