

ZT-16 Automatic Tea bag Packaging Machine

ZT-16 Tea-Bag Packing Machine is a kind of new multi-function machine with totally automatic filling for both inner and outer bags at one time; it is suitable for automatically packaging of steeping products, such as fragmental tear medical tee coffee. Etc. Outer envelope is made from hearable lamination packing material that the function for fresh protection, damp proof, and also avoiding volatile smelling, thus make the material an ideal choice for packaging of Chinese medical pills, healthcare tea and packed tea as well.

Features:

1. An outer seal paper by stepper motor control, bag length stable, accurate positioning;
2. Using the PID controller to adjust the temperature, temperature control more accurate;
3. The operation of the machine is controlled by PLC, HMI display, easy to operate;
4. All accessible part of SUS304 stainless steel material, reliable guarantee health products;
5. Part of the work cylinder using imported parts; ensure the accuracy and stability of its work.
6. The machine can complete additional device flat cut, date printing, easy to tear, and other functions.

Packing materials: Pet/Pe, Pet/Al/Pe, tea leaf filter paper.

Technical Data:

Type	ZT-16
Bag size (Inner bag)	(L)50-100mm/(W)30-80mm
Bag size (Outer bag)	(L)60-150mm/(W)40-105mm
Capacity	25-50 bags/min
Power	220V 50HZ 2.05KW
Weight	550KG
Filling range	2-12 ml
Dimension (L*W*H)	1150*500*1850 mm ³
