

## *AF-T Lab / Automatic Capsule Filling Machine (Lab Model)*

AF-T Lab is a fully-automatic capsule-filling machine that's suitable for laboratories. It ensures greater flexibility to experiment various combinations of dosage forms such that resultant formulations are production-line ready.

It is one-of-its-kind machine which allows any four sizes of the capsules with a single format part. Not only does this simple changeover save time and efforts, but also enables the scaling-up of the development process without any modification in formulations.

### **Features**

- Fully-automatic capsule-filling machine for R&D labs
- Single format part allowing experiments with up to four capsule sizes
- Easy and quick changeover
- Up to 6,000 capsules per hour (for powder filling); up to 5,000 capsules per hour (for pellet filling)
- Optimizing of process parameters that can be used in larger scale machines
- Also available with capabilities for multiple dosage combinations such as powders, tablets, pellets & more
- One set of change parts can be used for 4 different sizes of capsules
- Capable of filling capsules of all sizes from 000 to 5 and Clinicians
