XY-L760W Full Automatic Powder Packaging Machine

Product description:

Application Scope:

Applicable to powder materials in food, cosmetic, pharmaceutical, chemical, agriculture chemical industry etc.

Product characteristics

- Perfect combination of high precision and high speed;

- By high-precision digital sensor, it makes sure instant weighing in accuracy come true;

- Chinese/English or other languages operation system;

- The weighing control system is centrally controlled by PLC that is designed with anti-proof and anti-dust features according to IP54 Standard.

- It can micro adjust the speed of the hopper door opening or closing according to the material's characteristics to avoid material sticking or blocking.

- Powerful database of auto accounting function, it can record the total packages amount, qualified rate, average deviation of single pouch of each batch production.

- The auger weigh can be installed directly on the auto vertical packaging machine, making the device more tightly structured.

Technical Parameters:

Weighing Scope: 500-5000g

Accuracy: ±0.2-1%FS

Bag Size: 50-600/ 70-360(mm)（L*W）

Film Width (Largest): 760 (mm)

Packing Speed: 10-30bags/min

Power: 8Kw/20A

Air Consumption: 0.5-0.6Mpa 0.4m3 /min

Working Voltage: 3PH 50Hz 60Hz/220V 380V

Dimension: 2200*2200*2960 (mm)

Machine Weight: 1500kg

Interface：   5.7"LCD
