

L type Sealing and Cutting Shrink Wrap Machine LA-680E

1. Sealing knife is made of aluminum alloy coated with teflon, which is resistant to adhesion and high temperature. When sealing and cutting, it does not mucous membrane, has firm sealing, does not coker, does not emit smoke, and ensures zero pollution of working environment. Anti-overheating compensation device effectively extends the service life of the equipment; The safety protection function of the anti-clamping hand can prevent miscasting the packaging and ensure the safety of the operator;

V is equipped with imported detection photoelectricity, which is easy to switch and select, and easy to complete sealing operation. For packaging of different sizes, convenient and fast adjustment;

2. Automatically adjust the feeding length, and equipped with induction transceiver motor, can be self-winding transceiver;

3. Electrical components are imported well-known brands, to ensure the stability and accuracy of equipment;

4. With Plexiglas protective cover, meeting CE standard;

Optional:

1. transition belt
2. print film color code tracking electric eye
3. 1.2m feeding belt

Model no. : LA-680E

Seal size: 600X800mm

Packaging capacity: 25pcs/min

Packing size: L680 X W480 X H100mm

Power supply: 220V/1ph

Power: 2KW

Equipment size: L2360 * W1170 * H1770mm
