

SP-100 Semi Automatic Powder Packing Machine

Performance characteristics:

1. All 304 food grade stainless steel exterior, in line with GMP requirements.
2. PLC control, setting the number of screw revolutions through the touch screen, the accuracy is high.
3. The semi-automatic powder packaging model is applicable to the measurement and filling of materials with poor flow ability, such as pepper noodles, in addition to the completion of powdered metering and filling.
4. It is suitable for automatic measurement and packaging of powdery materials with low viscosity such as milk powder, rice flour, milk tea powder, protein powder, oatmeal, and seasoning.
5. Optional glass visible silo, with open hopper, more convenient cleaning, material level control.

Optional auxiliary equipment:

Continuous sealing machine (can print date), sealing, sewing machine, etc.

Technical Parameters:

Model	SP-100
Measuring range	1-50ml, 20-100ml, 30-100ml, or 100-500ml, 1000ml, 2000ml
Power Specifications	220v, 500w
Total weight	Total weight
Dimensions	450*700*1700mm
